The property has a calcada driveway, which leads across the front of the villa to the garage at the side, with a lawned area both to the front and rear, there's a lovely large patio area to the side of the house, and the gardens to the rear offer mature landscaping and a 11m x 6m swimming pool.

Although the property would likely need some modernising, internal changes would likely be sufficient due to the well sized construction already built. Eliminating any need for lengthy planning approval processes.
